

## OXYGEN CONCENTRATOR FOR VETERINARY CLINICS **NUVO LITE MARK 5**

The Nuvo 5 is a robust and compact device that delivers up to 5 litres of oxygen that can be used at your veterinary practice. The Nuvo 5 oxygen concentrator uses Pressure Swing Absorption (PSA) technology to deliver high concentration of oxygen that has been separated from other gases in the air.

The Nuvo 5 offers significant benefits when compared to having an oxygen cylinder at your practice.

### FEATURES AND BENEFITS

#### HUGE SAVINGS

With the Nuvo 5 veterinary practices that use oxygen could save up to 45% when compared when compared to owning or renting an oxygen cylinder.

#### EASY TO USE

The Nuvo 5 is simple and intuitive to use and has a flow dial selector to choose the appropriate flowrate of oxygen required. The Nuvo 5 gives veterinary practitioners flowrates from 0.125 to 5 litres per minutes.

#### SLEEK AND FLEXIBLE DESIGN

The device is ergonomically designed for everyday use and is built on a set of 4 wheels to allow users easily move the device to different areas of the practice as required.

#### RELIABILITY AND QUALITY

Nuvo 5 is built with high quality parts and is supplied with a 3 year warranty. The device meets the applicable requirements of the European medical device directive.

#### REDUCED MANUAL HANDLING

The Nuvo 5 can easily be attached to an anaesthetic machine and unlike an oxygen cylinder there is no need to frequently replace the oxygen cylinder when you run out.

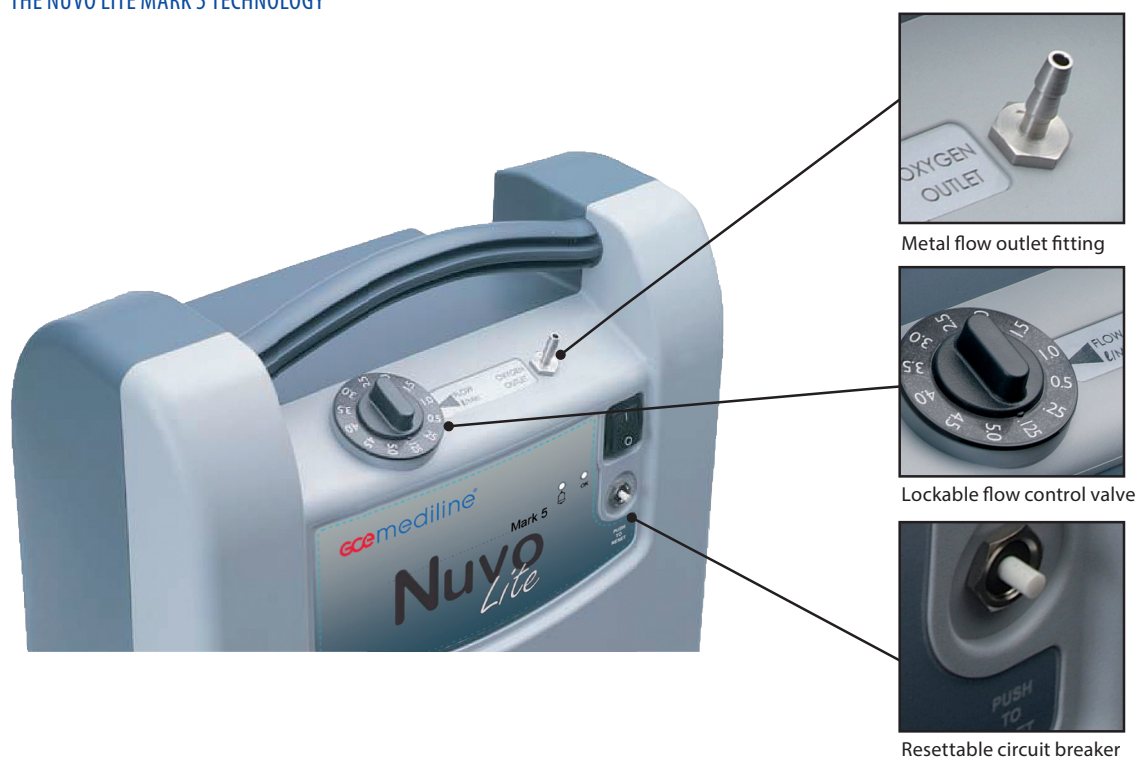

# NUVO LITE MARK 5

## TECHNICAL DATA

Power supply:	230 V, 50 Hz
Av. power consumption:	300 W
Fuse:	5 A
O <sub>2</sub> concentration:	at 2 l/min: >90 % at 5 l/min: 90 % (+6,5% - 3%)
Sound level:	40 dBA
Storage temperature:	-20 to +60 °C
Ambient temperature limit:	+5 to +40 °C
Weight:	14.5 kg
Dimensions (BxHxT):	36 × 23 × 58.5 (cm)
Technology:	PSA (pressure swing absorption)
Standard:	ISO 8359, EN 60601-1
Medical class:	IIb
Warranty:	3 years
