

Gas Control Equipment

## ACCESSORIES FOR HAND CUTTING TORCHES **CUTTING GUIDES**

The new range of guide tools for hand cutting torches designed to stabilize the cutting track and help make the cut perfect.

### ROLLER GUIDES

With cutting support, the wheels roll freely, even under harsh conditions. By controlling the torch height and position, all the operator needs to manage is the optimum cutting speed. The result is **a cleaner, more precise cut surface** every time, with **less cleanup time and effort**.

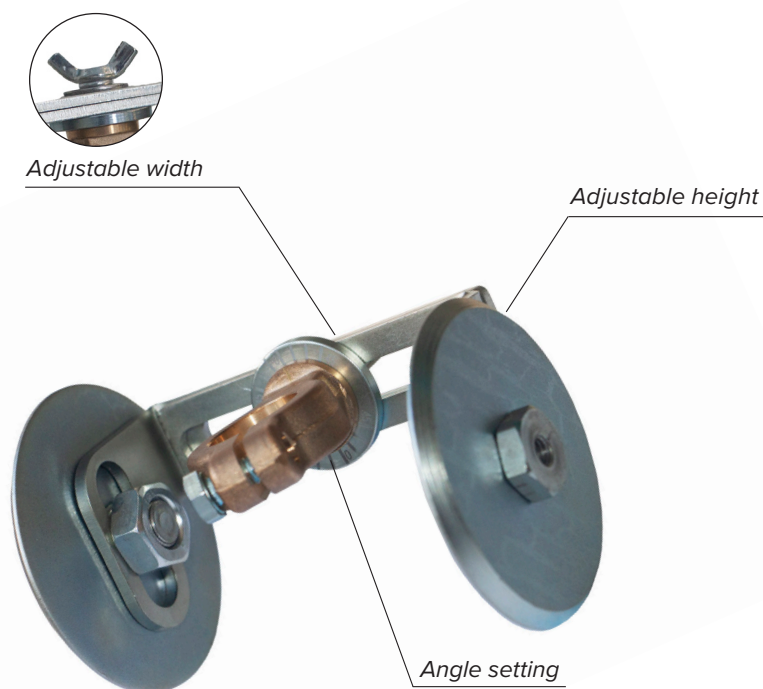

### CIRCLE CUTTING GUIDE

High-quality ball bearing circle-cutting device, **for narrow tolerance and high quality of cut** when cutting the circles and holes with manual gas cutting. The circle-cutting device is used together with GCE torches and fits three-cone nozzles.

## CUTTING GUIDES

### FEATURES

- Adjustable height of the cutting guide
- Angle setting for cutting variability
- Adjustable distance between the wheels for width setting
- Made of durable zinc-coated steel and brass
- Very user-friendly
- Makes cutting work much easier
- Available for various diameters of cutting nozzles/cutting torch heads
