COMBI TORCHES

GCE RHÖNA®

The GCE Rhöna Combi Torch range is a complete cutting and welding system with large capacity for several applications such as welding, cutting, soldering, heating, brazing, gouging, flame cleaning and straightening. The Rhöna range has been a part of the GCE product portfolio for more than 50 years thanks to its high quality valued by customers.

The Rhöna Combi Torch range includes products for both pressure and injector principles which are designed to meet the stringent demands in the standard EN ISO 5172. The new modern design is durable and robust which ensure a long life time. The patented valve design gives the basis to set a perfect flame and the mono block design makes repair and replacement very easy.

The injector cutting attachments are designed for oxygen and acetylene flames whereas the nozzle mix attachments are designed for both acetylene and propane.

The GCE Rhöna Combi torch range cover all common connection variants used in cutting and welding applications.

CUTTING AND WELDING **SHANK GCE RHÖNA®**

FEATURES / ADVANTAGES / BENEFITS

- Low weight and excellent use
- Durable powder coating on torch handle
- Manufacturing according to highest technical and ergonomic standards
- Mono bloc valves made of brass give a long life time
- Easy and quick repairs
- Potential to weld up to 14 mm
- Cutting up to 300 mm
- Compatible with Group Cutting Attachment
